

Medical Check-up

Strong health is the foundation for coping with today's demanding professional life, in order successfully to be able to handle the daily challenges. Anyone who performs constantly at a high level should have a regular check-up of their health.

A preventive health check-up is an important pre-requisite to maintain good health as well as to detect and inhibit serious illnesses. The hospitals of the Paul Gerhardt Diakonie offer a comprehensive range of examinations in the various specialisms that can be tailored to an individual Check-up programme.

The patient is given individual advice during a first thorough consultation. The specific examinations are chosen and combined on the basis of the patient's previous medical history and the identified needs. Naturally, the wishes of the patient will be complied with and any desired examinations included in the Check-up list.

Departments	Examinations	Price in euros (€)
Internal Medicine	In-depth discussion and detailed physical examination	240.00
	Preparation of check-up programme and MRT examinations	
	Screening laboratory (Main laboratory)	1,120.00
	Ergospirometry with ECG incl. lung function: echocardiography	590.00
	Gastroscopy	630.00
	Coloscopy	800.00
	Breath test	330.00
	Upper abdominal sonography and (for men) ultrasound of prostate	300.00
	Concluding discussion and evaluation of findings	200.00
Radiology	Duplex sonography of carotid arteries	380.00
	Lung x-ray	160.00
	Report on findings	50.00
	Whole body MRT native (body fat, tumours)	1,450.00
	Whole body MRT angiography (blood vessels)	1,510.00
	Dedicated breast MRT or CT (breast)	1,040.00
	MRT head	1,290.00
	Detailed MRT of selected areas of vertebral column / joints	1,250.00
Neurology	Neurological examinations and follow-up discussion	395.00
	Report on findings	57.00
Orthopaedics	Detailed orthopaedic examination and follow-up discussion	180.00
	Report on findings	50.00
Gynaecology/Breast Centre	Detailed gynaecological examination and follow-up discussion	710.00
	Report on findings	50.00
Urology	Detailed urological examination and follow-up discussion	695.00
	Report on findings	57.00
Ear, Nose and Throat	Detailed examination and follow-up discussion	270.00
	Report on findings	57.00
Eyes	Detailed examination and follow-up discussion	270.00
	Report on findings	57.00
Dermatology	Detailed examination and follow-up discussion	270.00
	Report on findings	57.00
Vascular Disease	In-depth discussion and detailed physical examination	240.00
	Preparation of check-up programme and ultrasound / MRT examinations	
	Screening laboratory (Main laboratory)	1,120.00
	Upper abdominal sonography incl. colour-coded duplex sonography of the aorta abdominalis, renal arteries and abdominal vessels	380.00
	Echocardiography	460.00
	Stress echocardiography	670.00
	CW doppler and colour-coded duplex sonography of cerebral arteries (carotis doppler/duplex)	380.00
	Transcranial duplex sonography (intracerebral vessels)	590.00
	Ankle artery pressure measurement for leg conditions	180.00
	Brachial artery pressure measurement	180.00
	Colour-coded duplex sonography of iliofemoral arteries	380.00
	Colour-coded duplex sonography of leg veins	380.00
	Colour-coded duplex sonography of brachial arteries	380.00
	Transcutaneous oxygen partial pressure measurement (tcPO ₂)	80.00
	Capillary microscopy	130.00
	Oscillography	110.00
	Thermoplate testing (Raynaud's disease)	120.00
	Determination of walking range on treadmill	80.00
	Venous occlusion phlethysmography	210.00
